

Locust Avenue Water Line Project

Bicycle Detour

The Locust Ave Bike lane will be closed from June 2025 to February 2026.

About the Project: The water main along Locust Avenue was installed in the 1920s, and has reached the end of its service life. This project is part of Utilities' ongoing replacement of outdated infrastructure throughout the entire water distribution system, and will contribute to strengthening the long-term sustainability, resiliency, and efficiency of the water system for all of Charlottesville.
