ENERGY & WATER

VALUE OF ENERGY & WATER

DID YOU KNOW?

Water is a limited resource. This gallon represents all the water currently in the world!

This very small drop represents all the available, fresh water we can use and access. This is the reason why we should only take what we need!

WHAT CAN WE DO?

SAVE ENERGY

Last one out?
Flip the Switch!

SAVE WATER

Turn the water off
when not in use!

SAVE THE PLANET

Only take what
you need!

The City of Charlottesville Energy and Water Management Program is here to help reduce your school's energy and water footprint. Each season, we will focus on new energy and water conservation strategies, education, and tips!
